to streamline day-to-day
facility operations.

Mobile-First Digitized Workforce

Digitize the execution
process and enable technicians
to view work orders and report
defects via mobile.

Auto Generate Reports

Track all relevant metrics &
get reports in a few clicks for
wise data-driven decisions.

30% Quicker Turn
Around Time

217% Increase in
ROI

80% Lesser Manual
Follow-up & Calls

BENEFITS

Uninterrupted Work by Technicians

Engineers can go ahead with work while offline and update the progress. Customers and asset owners receive comment notifications.

Improved Overall Business Growth

With a seamless movement of work orders through stages, everyone can play their part to their best in a safe, secure and comfortable environment.

Enforce Best Practices

Craft the best work orders with all data needed to accomplish the task(s) with clear, exact multimedia illustrations.

Cost Analysis

Instant automatic KPI values on cost, such as hours worked, spares consumed, etc., accessible via mobile dashboard helps limit the service costs.

Quicker Service Requests

The first observer of a defect can route it through the system with a simple QR Code mobile scan even if asset details are unknown.

Power of CAFM in Palms

Approve, schedule, monitor, measure & accelerate work from anywhere via a user-friendly mobile app away from the office.

Multiple Facilities Management

Integrate operations across facilities with smooth asset and technician transfer to compensate requirements or for maintenance purposes.

Green Buildings

Be informed of energy consumption with minute precision via IoT sensors to regulate the highest utility costs of a business with lesser carbon emissions.
