CMMS SOFTWARE FOR MODERN AGE TEXTILE INDUSTRY MAINTENANCE

Streamline maintenance of textile machinery for spinning, weaving, knitting & processing garment.

Increased Equipment Uptime

Scheduled preventive maintenance on equipment at regular intervals prevent unplanned downtime and maximize equipment uptime.

Enhanced Cost Control

Proper maintenance of assets makes less prone to asset failures which decreases repair costs and increases productivity.

Better Compliance

Helps in maintaining documentation of the maintenance services of assets and providing proof of the same to regulatory compliance.

20% Labour Cost Reduction.

15% Save on Maintenance.

50% Decreased Equipment Downtime.

BENEFITS

Extend the Asset Lifecycle
Frequently monitor the textile machinery or machine process, minimize equipment loss or equipment shortage and extend the lifespan of assets by 20%.

Minimize Unplanned Downtime
Proper maintenance schedule and asset history tracking identify potential issues before they become major problems.

Keep Accurate Inventory Records
Track the usage history of machinery and equipment, including when parts were last replaced or repaired.

Calibration of Equipment
The calibration workflow for measuring equipment's can be used to provide reliable measurements when done periodically.

Environment & Health Safety
Recycle water, heat and chemicals in a closed-loop system with work reminders via mobile app for environment health & safety.

Generate Reports Instantly
Reports are comprehensive covering all the aspects of textile unit maintenance and can be generated instantly based on several search filters.

KEY FEATURES

- Asset Management
- Work order Management
- Preventive Maintenance
- Multi Location Management
- Asset Tracking with BLE/RFID
- Asset Lifecycle Management

ADDITIONAL FEATURES

- Asset Movement Tracking
- Fixed Asset Auditing
- Procurement Management
- OEE in real-time with IoT
- Inventory Management
- Energy Metering Solution
